knas Restarter – Setting up your system

For starting knas Restarter you need the following tools: For download the application Install the freeware from this website: Download and install the program with this path: \gnome-shell\extensions\mska.knas Run the application It may take a minute or so to start scanning for the monitor, however once the monitor is ready, it will be checked every three seconds until you click the “Stop monitoring” button. The program does not hang your system and does not need a large amount of resources. For viewing logs Open the log file located in the \knas_restarter\monitoring\logs folder If you want to automatically clear the log, go to the \monitoring\logs folder and open the file named as n.log See the example below for a sample log: Server log 1 You can download the log using right click on the file name. In order to view the information about the monitor, you need to have Gnome Shell installed. Knas Restarter System Requirements Minimum OS: Windows XP/Vista/7/8/10 (32 or 64-bit) Program size: 2.5MB (58Kb uncompressed) I have some questions about the app: Is it possible to restart a running program after installing it? Can it check a program running when it is not possible to restart the process? Is it possible to use the app with a GUI (Not necessary)? A: 1) Yes, this is available in
